CYBERSECURITY RISK MANAGEMENT IN EVOLVING THREAT LANDSCAPE

31 October 2025
10:00 to 12:00 CET

This 2-hour course provides technical and non-technical teams with essential awareness of current cybersecurity threats and best practices for mitigating risks. Participants will learn about the evolving threat landscape, the role of senior management in cybersecurity risk management, and how to implement protective, detective, and reactive controls to enhance the organization's security posture. The course aims to equip all team members with the knowledge to contribute effectively to managing cybersecurity risks within their roles.
