AI FOR EVERYONE: PRACTICAL PRODUCTIVITY IN YOUR DAY-TO-DAY

3 September 2026
09:00 to 12:00 CET

This course is designed to help professionals understand and use artificial intelligence confidently in everyday work. Participants will explore practical, easy-to-apply AI tools that enhance productivity, decision-making, and efficiency across common tasks such as writing, research, data handling, and communication. No technical background is required. Through real-world examples and hands-on guidance, the course demystifies AI and shows how it can be integrated responsibly and effectively into daily workflows to save time, reduce repetitive work, and support smarter outcomes.
