# Practical Issues of Carrying Out a Credit Assessment

Course No 164

The most important characteristic of a good line of credit afforded by a credit institution to an applicant is that it gets repaid. This requires a credit assessment process that could include profiling, economic stress testing, risk, financial and business analysis, and collateral availability. This course will address the credit proposal assessment process and give key practical insights to help attendees to carry out good quality assessments which will result in good mutually beneficial business.

## Sample Topics Covered:

What is credit?

---

Different profiles of customers requesting credit and credit products

---

The credit risk environment and the importance of managing credit risks

---

Characteristics of good credit

---

Preparing for the customer meeting

---

Analyzing the business – from a customer and financials assessment perspective

---

Assessing the customer's proposal

---

Useful tools to supplement credit analysis – CreditInfo, MBR, Court databases

---

Collateral – types and characteristics

---

Common pitfalls – what are these; identifying and avoiding

---

Preparing the credit proposal; an introduction to report writing

---

Analyzing a credit proposal; a practical example and discussion

---
