

NATHAN CIANTAR

Online Course

PRIVACY BY DESIGN AND DEFAULT

1 October 2025
09:00 to 11:00 CET

This course explores the implications of Artificial Intelligence (AI) on data protection within the European Union context. Participants will gain a deep understanding of the intersection between AI technologies and data privacy laws, particularly focusing on the General Data Protection Regulation (GDPR). The course covers key topics such as the legal challenges posed by AI in data processing, privacy risks, automated decision-making, and the ethical considerations surrounding AI applications. Participants will also examine the regulatory frameworks that govern AI and data protection in the EU, and explore best practices for ensuring compliance with privacy standards while leveraging AI technologies. Practical case studies and real-world examples will help attendees apply the concepts to their own organisations.
