

SANDRO BALUCI

HOW BONDS WORK

23, 24 September 2025
13:30 to 16:00 CET

This course provides an introduction to bond investing, covering both the basics and more advanced features of this popular asset class. Participants will learn about bond pricing mechanisms, the structure of fixed income markets, and strategies for building a bond portfolio. The course will also focus on how to select bonds based on key characteristics such as yield, credit analysis of issuers, and investment term. By the end, attendees will have a solid understanding of bond investing principles and how to effectively incorporate bonds into their investment strategy.
