MALCOLM ST JOHN

# FINANCIAL STATEMENTS ANALYSIS

24, 25, 26 September 2025  
09:00 to 12:00 CET

This course is an introduction to understanding how to use financial information to value and analyse companies. The course focuses on the practical application of financial statements analysis. Participants will learn how to create and analyse financial ratios, such as debt to equity, profit margins and more. Participants will gain analytical skills involved in reading and interpreting the financial health and profitability of a company through quantitative and qualitative techniques. A number of case studies and financial statements of actual companies will be analysed.
