Directors' Report

The Directors are pleased to present the tenth Annual Report of Metatron Capital SICAV plc covering the year ended 30 June 2022.

Principal activities

Metatron Capital SICAV plc (the "Funds" or the "Company") is a collective investment scheme established and licensed and regulated by the Malta Financial Services Authority having Licence Number CIS/177H under the Investment Services Act, 1994 (Chapter 370, Laws of Malta) as a Professional Investor Fund under the laws of Malta, having company registration number SV 177, with its registered office situated at Vision Exchange Building, Territorials Street, Zone 1, Central Business District, Birkikara CBD 1070, Malta. The Funds are self-managed and the overall investment strategy and parameters for the current Funds are determined by the Company's Investment Committee during regular meetings held periodically in Malta.

During the financial year under review, the composition of the Investment Committee and the composition of the Board of Directors has not changed. The Directors of the Company who held office during the year under review are listed on page 2.

The implementation of the Company's investment strategy and day-to-day management of the Funds has been assigned by the Board in terms of a written agreement to the authorised Portfolio Managers. The usual risk management procedures involving the proper monitoring of risks and sensitivities are performed on a daily basis.

Review of business developments and financial position

The Company had three funds as of 30 June 2022 – namely Metatron Global Macro Fund (MGMF), Metatron Short Equity Fund (formerly known as Metatron Long-Short Equity Fund) (MSE) and Metatron Long-Term Equity Fund (MLTE).

During the twelve months under review, the Company has registered from its operations a net decrease in assets attributable to redeemable participating shareholders amounting to €4,994,358. Net assets attributable to redeemable participating shareholders as at 30 June 2022 thus reached a total of €177,607,122. The total net assets attributable to redeemable participating shareholders increased from €151.3 million in 2021 to €177.6 million in 2022. This increase was mainly due to the positive performance of MLTE during the period as well as the significant inflows of new capital sourced from a number of investors to MLTE.

On the administrative side, the outsourcing of additional support to Portfolio Managers and internal development of tools continued covering a range of activities, fine-tuning current operational tools and supporting and improving the investment processes. Directors have also done the review of Depositary Sparkasse Bank Malta as its key services provider with the special focus on safekeeping and segregation of assets. The bank has prepared a special memo in this regard which was reviewed by the Metatron legal counsel.

Despite the pandemic, the Company registered continued interest from High Net Worth Individuals both directly but also through a number of distributors. Promotional activities are being increasingly focused on cooperation with distributors. Portfolio managers and directors will, however, continue developing their individual promotional efforts. Obtaining the AIFM licence followed by the notification in several EU countries enabled the Company to further broaden the promotional activities. Regionally, the core of the distribution will stay in the Czech Republic and Slovakia.

The Company has received the following derogations from MFSA:

- i) Internal Audit Derogation Granted on 7 July 2020 and expires on 30 June 2023; and
- ii) Remuneration Derogation Granted on 5 May 2021 and expires on 18 November 2022.

The directors and founder shareholders are also well aware of the fact that many people have been affected negatively by the pandemic. That is why founder shareholders and directors have decided to make donations from Company profits to four selected registered charity organizations to try to mitigate the negative impact of the pandemic.

List of principal risks and uncertainties

The managers consider the following key risks to its business:

- Loss of key personnel. Given the current size of its operations, the Company does not have a substitute for every key staff member. However, the key portfolio managers are also the owners of the Company so the risk of loss of personnel affecting the performance is limited.
- Redemption by a major investor. Concentration risk affects mainly Metatron Global Macro Fund, but would not affect the other funds as the investor base is diversified.
- Loss of a major distributor. At the moment, the Company has just one key external distributor. Its departure could negatively affect the assets under management. The Directors are trying to sign contracts with more distributors in an attempt to diversify or reduce dependency.
- Major market downturn. All sub-funds of the Company have at least one market-neutral share-class which is being hedged against equity beta risk. However, this hedging
 might not be perfect or added at the right time. The most vulnerable to this risk is Metatron Long-Term Equity Fund.
- Exchange rate risk. Although sub-funds invest into currencies other than base currency of a particular share class, exchange rate fluctuations related to such exposures are being hedged, mainly those in CZK and USD. The exchange rate exposures are therefore limited. The most vulnerable to this risk is Metatron Global Macro Fund.
- Emerging market risk. Although none of the funds specifically target emerging markets, some assets of the sub-funds can be invested in emerging markets, particularly Eastern and Central Europe. These are mainly fixed-income investments. The risk is well monitored and managed thanks to extensive knowledge of these markets by the portfolio managers.
- Interest rate risk. The Company monitors the interest rate risks very closely and manages them actively. However, given the exposure to fixed interest instruments, a sudden increase in interest rates can affect the value of the portfolio negatively. The most vulnerable to this risk is Metatron Global Macro Fund.
- Credit risk. Some of the sub-funds might be exposed to investment instruments with below-grade rating or no credit rating at all. However, this risk is actively monitored. It is not a part of investment policy of any sub-fund to derive a material part of its return from credit exposure.
- Risk from investing into OTC derivatives. The Company invests into OTC derivatives only on a limited basis and in cases where investment strategy cannot be
 materialized through investment into exchange-traded derivatives.

The Directors continue to identify and monitor the key risks and take steps to mitigate them and their potential negative impact.

Directors' Report (continued)

Going concern statement

As at 30 June 2022, the financial position of the Company was very strong with total equity attributable to founder shareholders of €895,839 relative to total assets attributable to €177,607,122 respectively. The Company is also exposed to monthly cash redemptions of the Company's shares. However, the Company's listed securities are considered readily foreseeable future.

Future developments

The main focus of the Company is still and, indeed, will always be to concentrate on perfecting and improving the investment processes in order to continue building a solid track record. Still, the open, transparent and detailed communication with investors is a key objective both of the Directors and the Portfolio Managers. The determined effort of the whole team is aimed at delivering and fulfilling the investment objectives of the Funds taking into consideration the appropriate risk/reward balance. The management has closely watched the performance of the service providers during the pandemic and their ability to operate remotely without compromising the quality and range of service. The various parts of compliance monitoring programme have also taken into consideration the changed situation under which the fund operates.

On 6 October 2021, Tomas Martinec has resigned as a portfolio manager of the Metatron Global Macro Fund due to his other involvement in JaT Investment Company. On 10 May 2022, Juraj Podracky and on 16 May 2022 Pavol Redler were appointed as portfolio managers of this sub-fund.

In conclusion, the Directors of the Company believe that the positive historical performance of the Funds supported by the recent technological improvements which have been adopted by the Company together with its AIFM status, will place the Funds in a strong position to deliver long-term growth in assets under management.

Auditors

PricewaterhouseCoopers have indicated their willingness to continue in office and a resloution for their appointment will be proposed at the Annual General Meeting.

Results and dividends (paid and proposed)

During the twelve months under review, the Company has registered from its operations a net decrease in assets attributable to redeemable participating shareholders amounting to €4,994,358. Net assets attributable to redeemable participating shareholders as at 30 June 2022 thus reached a total of €177,607,122.

The Directors have declared and paid dividends amounting to €1,250,044 to the associate shareholders. After the reporting period, the Directors proposed dividends amounting to €175,863 to the preferred shareholders. Directors are confident that the strong capital base will allow substantially larger redistrubution of earings in the next accounting periods.

Standard licence conditions and regulatory sanctions

During the year under review, there were no breaches of the Standard Licence Conditions and no breaches of regulatory requirements, which were subject to any administrative penalty or regulatory sanctions.

Directors

In accordance with Article 22.3 of the Company's Articles of Association, all the Directors are due to retire at the Company's forthcoming Annual General Meeting and being eligible for re-election.

Approved by the Board of Directors on 27 October 2022 and signed on its behalf by:

Paul Magro Director

Mark Guillaumier Director

Manager's Report

Funds overview and review of performance

In the fiscal year 2021/2022 the three Funds managed under Metatron Capital SICAV plc recorded a mixed performance. Metatron Global Macro Fund ("MGMF") has beaten its benchmark (1Y Euribor + 4% p.a.) and returned 7.95%. Metatron Short Equity Fund (formerly known as Metatron Long-Short Equity Fund) ("MSE") returned a stunning 49.42%. Metatron Long-Term Equity Fund ("MLTE") showed a negative return of -9.20% as the global equity indices tumbled. The historical performance for each fiscal year can be viewed in the table on the right. For each Fund the comment by portfolio manager is provided below, followed by NAV chart and a detailed month-by-month performance table.

Metatron Global Macro Fund

MGMF experienced a fruitful fiscal year. Bulk of the gains came from the 1st quarter of 2022 when the Fund participated on strong movements in oil price via oil futures, options and stocks of oil companies. Our conviction from last year, that the FED was behind the curve and would raise the rates sooner than markets expected, materialized and lead to high returns on our positions in US Treasuries. The Fund's performance stayed positive despite the difficult and very volatile market conditions throughout the fiscal year

Metatron Short Equity Fund (formerly known as Metatron Long-Short Equity Fund)

The performance in fiscal year 2021/2022 was exceptional for MSE. The main driver which stood behind almost 50% return was a change in the Fund's objective and its transformation to Short Equity (formerly known as Long-Short Equity). As such the Fund increased its net short exposure and participated on the broad market self-offs. The gains came mainly from carefully picked single stock short positions in companies identified as fraud, which inaccurately or even falsely inform their shareholders about the actual state of affairs. The list includes companies such as Cassava Sciences, Carvana, Grenke AG, Ebix Inc or South African bank Capitec.

Metatron Long-Term Equity Fund

As a Fund with 100% net long exposure, MLTE's performance is heavily correlated with the performance of major world equity indices. The market sell-offs in the second half of the fiscal year resulted in the S&P 500 index entering bear market territory in June 2022, which weighed down on Fund's return. During the period, however, the portfolio manager succeeded in outperforming the Fund's internal benchmark (weighted index of 65% S&P 500 and 35% Euro Stoxx 50) by roughly 3 percentage points so the Fund's performance in fiscal year 2021/2022 was overall good.

Directors' Responsibility for the Financial Statements

The directors are required by the Maltese Companies Act (Cap. 386) to prepare financial statements which give a true and fair view of the state of affairs of the company as at the end of each reporting period and of the profit or loss for that period.

In preparing the financial statements, the directors are responsible for:

- ensuring that the financial statements have been drawn up in accordance with International Financial Reporting Standards as adopted by the EU;
- selecting and applying appropriate accounting policies;
- · making accounting estimates that are reasonable in the circumstances;
- ensuring that the financial statements are prepared on the going concern basis unless it is inappropriate to presume that the company will continue in business as a going concern.

The directors are also responsible for designing, implementing and maintaining internal control as the directors determine is necessary to enable the preparation and the fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error, and that comply with the Maltese Companies Act (Cap. 386). They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Signed on behalf of the Board of Directors by:

Paul Magro Director

Mark Guillaumier Director

Independent auditor's report

To the Shareholders of Metatron Capital SICAV p.l.c.

Report on the audit of the financial statements

Our opinion

In our opinion:

- The financial statements give a true and fair view of the financial position of Metatron Capital SICAV p.l.c. ('the company') as at 30 June 2022, and of the company's financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ('IFRSs') as adopted by the EU; and
- The financial statements have been prepared in accordance with the requirements of the Maltese Companies Act (Cap. 386).

Our opinion is consistent with our additional report to the Board of Directors.

What we have audited

Metatron Capital SICAV p.l.c.'s financial statements, set out on pages 17 to 55, comprise:

- the statement of financial position as at 30 June 2022;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity attributable to founder shares for the year then ended;
- the statement of changes in net assets attributable to redeemable participating shareholders for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the Shareholders of Metatron Capital SICAV p.l.c.

Independence

We are independent of the company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements of the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap. 281) that are relevant to our audit of the financial statements in Malta. We have fulfilled our other ethical responsibilities in accordance with these Codes.

To the best of our knowledge and belief, we declare that we have not provided non-audit services that are prohibited under Article 18A of the Accountancy Profession Act (Cap. 281).

We did not provide any non-audit services to the company during the year ended 30 June 2022.

Our audit approach

Overview

- Overall materiality: 1% to 2.5% of net asset value ("NAV") for the company's subfunds.
- The company is a self-managed multi-fund public limited liability investment company with variable share capital which had three segregated sub-funds during the year ended 30 June 2022, each constituting a patrimony separate from one another.
- The company's accounting is delegated to the Administrator, Apex Fund Services (Malta) Limited, which maintains its own accounting records and controls, and reports to the Investment Committee, Portfolio Managers and the Directors.
- We tailored the scope of our audit taking into account the types of investments held by the sub-funds, the involvement of the third parties referred to above, the accounting processes and controls and the industry in which the company operates.
- Valuation and existence of financial assets at fair value through profit or loss.

To the Shareholders of Metatron Capital SICAV p.l.c.

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we considered where the Directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the company, the accounting processes and controls, and the industry in which the company operates.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

| Overall materiality and how we determined it | 1% to 2.5% of net asset value ("NAV") for the company's sub-funds. |
|---|---|
| Rationale for the materiality benchmark applied | Net assets is considered to be an appropriate benchmark as we consider this to be one of the principal considerations for investors of the Fund in assessing the financial performance of the Fund. We also believe that this provides an appropriate and consistent year-on-year basis for our audit. We chose 1% to 2.5%, based on professional judgement, noting that it is also within the range of commonly accepted asset-related thresholds that we consider acceptable. |

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 0.05% of each of the sub-fund's NAV as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

To the Shareholders of Metatron Capital SICAV p.l.c.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Valuation and existence of financial assets at fair value through profit or loss

As described in Note 4 to the Financial Statements, the investment portfolios as at year-end comprised listed equity, debt securities, options, future options, futures, swaps and forwards.

We focused on the valuation and existence of financial assets at fair value through profit or loss because they represent the principal element of the net asset value, which is the most significant key performance indicator of the company and has a direct effect on the recognition of gains and losses on financial assets at fair value through profit or loss.

How our audit addressed the Key audit matter

We tested the valuation of the financial assets at fair value through profit or loss by agreeing the prices used in the valuation to independent third party sources.

We tested the existence of the investment portfolio by agreeing the holdings for financial assets at fair value through profit or loss to independent custodian and prime broker confirmations.

We also considered the company's disclosures for compliance with International Financial Reporting Standards as adopted by the EU.

Our testing did not identify any material differences.

To the Shareholders of Metatron Capital SICAV p.l.c.

Other information

The directors are responsible for the other information. The other information comprises the management and administration section, the directors' report, the manager's report, the directors' responsibility for the financial statements and further information (but does not include the financial statements and our auditor's report thereon).

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon except as explicitly stated within the *Report on other legal* and regulatory requirements.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs as adopted by the EU and the requirements of the Maltese Companies Act (Cap. 386), and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report - continued To the Shareholders of Metatron Capital SICAV p.l.c.

Auditor's responsibilities for the audit of the financial statements -continued

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

To the Shareholders of Metatron Capital SICAV p.l.c.

Report on other legal and regulatory requirements

The *Annual Report and Financial Statements 2022* contains other areas required by legislation or regulation on which we are required to report. The Directors are responsible for these other areas.

The table below sets out these areas presented within the Annual Report, our related responsibilities and reporting, in addition to our responsibilities and reporting reflected in the *Other information* section of our report. Except as outlined in the table, we have not provided an audit opinion or any form of assurance.

| Area of the Annual Report and Financial Statements 2022 and the related Directors' responsibilities | Our responsibilities | Our reporting |
|---|---|---|
| Directors' report (on pages 3 to 4) The Maltese Companies Act (Cap. 386) requires the directors to prepare a Directors' report, which includes the contents required by Article 177 of the Act and the Sixth Schedule to the Act. | We are required to consider whether the information given in the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements. We are also required to express an opinion as to whether the Directors' report has been prepared in accordance with the applicable legal requirements. In addition, we are required to state whether, in the light of the knowledge and understanding of the Company and its environment obtained in the course of our audit, we have identified any material misstatements in the Directors' report, and if so to give an indication of the nature of any such misstatements. | the information given in the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and the Directors' report has been prepared in accordance with the Maltese Companies Act (Cap. 386). We have nothing to report to you in respect of the other responsibilities, as explicitly stated within the Other information section. |

Our reporting

Other matters on which we are required to report by exception

We also have responsibilities under the Maltese Companies Act (Cap. 386) to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us.
- the financial statements are not in agreement with the accounting records and returns.
- we have not received all the $information \, and \, explanations \,$ which, to the best of our knowledge and belief, we require for our audit.

We have nothing to report to you in respect of these responsibilities.

To the Shareholders of Metatron Capital SICAV p.l.c.

Other matter – use of this report

Our report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with Article 179 of the Maltese Companies Act (Cap. 386) and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior written consent.

Appointment

We were first appointed as auditors of the company on 18 June 2022.

1 Reporting Entity

Metatron Capital SICAV plc ("the Company") is a collective investment scheme organized as an open-ended multi-fund public limited Company with variable share capital. The Company was registered on 20 April 2011 under the Companies Act, 1995 (Chapter 386, Laws of Malta) and is licensed and regulated by the Malta Financial Services Authority having Licence Number CIS/177H under the Investment Services Act, 1994 (Chapter 370, Laws of Malta) as a Professional Investor Fund. The Company was subsequently converted into a self-managed Alternative Investment Fund (and licensed as) on 4 September 2018.

The Company is the reporting entity and comprises all the activities of Metatron Capital SICAV plc as the entity with the separate legal personality. The Statutory Financial Statements are those presented for the Company. The sub-funds are an integral part of that entity, as these do not have separate legal personality.

In accordance with the relevant local practice, the financial statement caption amounts in the primary financial statements are also presented in a segregated format: those amounts 'attributable to the founder shareholders', and those amounts 'attributable to shareholders of the investor shares' (segregated by the specific sub-fund). Also in accordance with local practice, where appropriate, disclosures in the notes in the financial statements are segregated by sub-fund. Such presentation of the financial statements is nonetheless not a statutory requirement.

As at 30 June 2022 the Company had three (3) Sub-Funds, namely Metatron Global Macro Fund ("Global Macro"), Metatron Short Equity Fund (formerly known as Metatron Long-Short Equity Fund) ("Short Equity") and Metatron Long-Term Equity Fund ("Long-Term Equity").

Metatron Long-Short Equity ("Long-Short Equity") changed its name to Metatron Short Equity ("Short Equity") Fund on 27 May 2022.

Two of the Company's sub-funds, namely Short Equity (formerly known as Long-Short Equity) and Long-Term Equity are listed on the Malta Stock Exchange. Long-Term Equity subfund was admitted to trading on the Malta Stock Exchange on 30 June 2021.

Each Sub-Fund has its own investment objective and strategy.

Global Macro

Investment Objective

The objective of the Metatron Global Macro Fund is the maintenance of value and the achievement of a balanced long-term capital appreciation with downside protection.

Investment Strategy

The Sub-Fund mainly invests in listed financial instruments world-wide including emerging markets, particularly in bonds, equities, futures and options denominated in major or local currencies. However, a strong emphasis will be given to the liquidity of the underlying positions.

The Sub-Fund may seek to shelter its portfolio from market movements by hedging its investment positions on an individual or consolidated basis from time to time. In order to ensure a minimum risk element, the Sub-Fund will focus on managing the depth of potential drawdown, and will adopt a clear set of rules to determine the maximum exposure in view of the performance of the investment portfolio.

Any current liquidity might be deposited with banks on short to mid-term basis.

Short Equity (formerly known as Long-Short Equity)

Investment Objective

The objective of the Metatron Short Equity Fund (formerly known as Metatron Long-Short Equity Fund) is to achieve substantial capital appreciation through fundamentally driven, value oriented investing in listed financial instruments including shares, ETFs, options, futures, fixed income and foreign exchange instruments. The Sub-Fund may invest in real estate via ETFs, REITs or any similar instruments listed on recognised stock exchanges.

Investment Strategy

The Sub-Fund will seek to attain its investment objective by adopting a capital appreciation investment approach with the aim of achieving capital appreciation through medium to long-term fundamentally driven, value oriented investing techniques. The Sub-Fund will accordingly invest in a selected and diversified portfolio, including shares, ETFs, options, futures, fixed income and foreign exchange instruments.

The Sub-Fund will not be targeting any particular industry sector or any particular geographical region. The regional and industry exposure will be driven by actual investment opportunity as determined by the Portfolio Manager on the basis of fundamental valuations. The Sub-Fund aims to achieve its investment objective through a thorough fundamentally driven research that will lead to identification of investment opportunities that meet specific investment criteria. These criteria include but are not limited to various valuation metrics such as free cash flow, dividend yield and book value as well as return/risk potential of considered investments. The Sub-Fund will target medium to long term holding period, however the Portfolio Manager might from time to time also engage in active short-term trading to eliminate the impact of sudden market fluctuations. For the purpose of management of excess liquidity, the Sub-Fund may invest in listed corporate bonds.

When holding assets denominated in currencies other than the Functional Currency of this Sub-Fund, the resultant currency exposure could be hedged, if determined necessary by the Portfolio Manager. The strong emphasis will be given to liquidity of all investment positions.

Long-Term Equity

Investment Objective

The objective of Metatron Long-Term Equity Fund is to achieve long-term capital appreciation over the business cycle. To achieve this, the Sub-Fund will invest in equities listed on major developed markets with an intended holding period of several years.

Investment Strategy

The Sub-Fund will employ fundamental bottom-up stock analysis to deliver the desired returns. The Portfolio Manager of the Sub-Fund will conduct thorough fundamental analysis using proprietary quantitative fundamental criteria focused on balance sheet strength, operating margins, free cash flow generation and sustainability of revenues in order to identify corporations with a long-term ability to deliver above-average shareholder returns.

Stocks that meet such criteria will be considered for purchase and held for longer investment horizons, ranging in average from a few quarters to a few years. The emphasis will be put on long-term nature of shareholder value creation rather than on quarter-by-quarter management moves. Only companies demonstrating history of several years to decades of above average value creation will be considered. However, the Sub-Fund will not be quantitative in its nature as a purchase decision will not be made automatically once the Company meets the selected criteria. Qualitative review of management and industry will be made as a part of the portfolio selection process. The companies that no longer meet the criteria either through actions by their managements or changes in their operating environment will be sold and removed from the list of suitable investments.

Availability of suitable investments will influence the cash balance of the portfolio; however, the Sub-Fund is expected to be fully invested most of the times through the cycle. The Sub-Fund will not target any particular industry sectors, categories of issuers or specific geographic locations. In spite of this, the bulk of the exposure will be coming from G7 countries.

2 Basis of Preparation

2.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union ("IFRS"). All references in these financial statements to IAS, IFRS or SIC/IFRIC interpretations refer to those adopted by the European Union.

The Company maintains a separate account for each Fund, to which proceeds are credited, and against which expenses are charged. Upon redemption, shareholders are entitled only to their proportion of the net assets held in the account relating to the Fund in which their participating shares are designated.

The Statement of Financial Position presents assets and liabilities in increasing order of liquidity and does not distinguish between current and non-current items. Financial assets at fair value through profit or loss are intended to be held for an indefinite period of time and may be sold in response to needs for liquidity or in accordance with the Sub-Investment Manager's recommendations. All other assets and liabilities are expected to be realised within one year.

These financial statements have also been prepared and presented in accordance with the provisions of the Companies Act, 1995 (Chapter 386, Laws of Malta).

2.2 Basis of measurement

The financial statements have been prepared under the historical cost convention except for financial instruments at fair value through profit or loss, which are measured at fair value.

2.3 Functional and presentation currency

These financial statements are presented in euro, which is the Company's functional currency.

'Functional currency' is the currency of the primary environment in which the Company operates. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effect of underlying transactions, events and conditions. The Company's investments and transactions are denominated in Euro, US dollars, Sterling, Swiss francs and other currencies. Subscriptions and redemptions of Investor Shares in Metatron SICAV plc sub-funds are denominated in Euro, US Dollars and Czech Korona. The performance of the Company is measured and reported to investors in Euro. The expenses (including management fees, custodian fees and administration fees) are denominated and paid mostly in Euro. Accordingly, management has determined that the functional currency of the Company is Euro.

2.4 Use of estimates and judgements

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in notes 4 and 5.

3 Summary of significant accounting policies

The accounting policies applied in these financial statements are the same as those applied in the financial statements as at and for the year ended 30 June 2021 and have been applied consistently throughout these financial statements.

3.1 Foreign currency translation

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency using the exchange rate prevailing at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date the fair value was determined. Net foreign exchange differences arising on retranslation of financial instruments at fair value through profit or loss are included in the statement of comprehensive income, in the line item "Net income/(loss) on financial instruments at fair value through profit or loss". Net foreign exchange differences on retranslation of other monetary assets and liabilities are included in the line item "Other foreign exchange gains/(losses)".

3.2 Financial assets and financial liabilities

Recognition and initial measurement

Financial assets and liabilities at fair value through profit or loss ("FVTPL") are recognised when the Company becomes party to the contractual provisions of the instrument. Recognition takes place on the trade date where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned. Other financial assets and liabilities are recognised on the date they are originated.

Classification

On initial recognition, the Company classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are Solely Payments of Principal and Interest ("SPPI").

All other financial assets of the Company are measured at FVTPL.

3 Summary of significant accounting policies (continued)

3.2 Financial assets and financial liabilities (continued)

Classification (Continued)

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

The Company has determined that it has two business models.

- Held-to-collect business model: this includes cash and cash equivalents, balances due from brokers and receivables from reverse sale and repurchase agreements. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt securities, equity investments, investments in open-ended investment funds and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cashflows;
- leverage features;
- prepayment and extension features;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

Subsequent measurement of financial assets

| Financial assets at FVTPL | These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income and expense and foreign exchange gains and losses, are recognised in 'net income/(loss) from financial instruments at FVTPL' in the statement of comprehensive income. |
|------------------------------------|---|
| | Debt securities, equity investments, investments from open-ended investment funds and derivative financial instruments are included in this category. |
| Financial assets at amortised cost | These assets are subsequently measured at amortised cost using the effective interest method. Interest income is recognised in 'interest income calculated using the effective interest method', foreign exchange gains and losses are recognised in 'net foreign exchange loss' and impairment is recognised in 'impairment losses on financial instruments' in the statement of comprehensive income. Any gain or loss on derecongition is also recognised in profit or loss. |
| | Cash and cash equivalents, balances due from brokers, loans and receivables from reverse sale and repurchase agreements are included in this category. |

Financial liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial liabilities at FVTPL:

- Held for trading: securities sold short and derivative financial instruments

Financial liabilities at at amortised cost:

- This includes balances due to brokers, payables under sale and repurchase agreements and redeemable shares.

Summary of significant accounting policies (continued)

Financial assets and financial liabilities (continued)

Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments traded in an active market is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs and adjusted for any tax effect on the maturity of such instruments. These instruments are priced at current mid-market prices. Management concluded that mid-market prices for such instruments are representative of fair value.

Equities traded over-the-counter are valued at the last reported sale price on or within a reasonable range of days prior to the day of valuation quoted through any recognized interdealer quotation system. Equities which are not listed on a stock exchange or traded over the-counter are valued at fair market value as established by the directors or its agents.

Units or shares in open-ended investment schemes are valued at the latest available net asset value as quoted by such collective investment schemes. The latest available net asset value will be the latest reported net asset value or, if unavailable or not available for the timely calculation of the valuation of the assets of the Company, the latest estimated net asset value. Units or shares in closed-ended collective investment schemes will, if listed, quoted or traded on a regulated market, be valued at the latest trade price or a mid quotation (or, if unavailable, a bid quotation) or, if unavailable or unrepresentative, the probable realization value as at the Valuation Date estimated with care and in good faith by the directors or their agents

Exchange-traded derivative instruments are valued on each relevant valuation date at the settlement price for such instruments on such market as at the relevant valuation date. If such price is not available, such value shall be the probable realization value estimated with care and in good faith by the directors. Over-the-counter derivative instruments are valued by the counterparty, which valuation will be verified monthly by the directors or their agents as persons independent of the counterparty. Forward foreign exchange contracts are valued with reference to the prevailing market maker quotations, namely, the price at which a new forward contract of the same maturity could be undertaken or, if unavailable, they will be valued by the counterparty at least monthly, which valuation will be verified by the directors or their agents as persons independent of the counterparty.

Amortised cost measurement

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The Company recognises loss allowances for Expected Credit Losses ("ECLs") on financial assets measured at amortised cost. The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information. The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due

The Company considers a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'. The Company considers this to be BBB+ or higher per S&P Rating Agency. In case of non-rated counterparties, Company involves case-by-case operational assesment, based on counterpart fundamentals, market conditions, and any other factors impacting such an assessment.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer; a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

3 Summary of significant accounting policies (continued)

3.2 Financial assets and financial liabilities (continued)

Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all the risks and rewards of ownership and does not retain control of the financial asset. Any interest in such transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised), and consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

The Company derecognises a financial liability when its contractual obligations are discharged, cancelled or expire.

Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a current legal right to offset the amounts and it intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, e.g. for gains and losses arising from a group of similar transactions, such as gains and losses from financial instruments at fair value through profit or loss.

3.3 Cash and cash equivalents

Cash and cash equivalents comprise cash with banks and demand deposits. Cash equivalents are short-term, highly-liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. Cash and deposits with banks and brokers are stated at their principal amount.

3.4 Amounts due from/to brokers

Amounts due from and due to brokers (margin accounts) are initially measured at fair value plus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method.

3.5 Revenue recognition

Interest is recorded on an accruals basis. Dividends are recorded on an ex-dividend date basis.

3.6 Expenses

All expenses are recognized on an accrual basis.

3.7 Redeemable shares

The redeemable shares for each sub-fund provide investors with the right to require redemption for cash at a value proportionate to the investor's share in the sub-fund's net assets, at each monthly redemption date and also in the event of the Company's liquidation.

The redeemable shares are classified as financial liabilities at amortised cost and are measured at the redemption amount. In accordance with the Company's offering memorandum, the redemption amounts of the individual redeemable shares are calculated using the mid-market prices of the respective sub-fund's underlying investments/securities short positions. In accordance with IFRS 13, fair value measurements are based on quoted market mid-prices on each valuation day for both financial assets and financial liabilities where this price falls within the bid-ask spread. In circumstances where the market mid-price is not within the bid-ask spread, the Board of Directors determines the point within the bid-ask spread that is most representative of fair value.

3.8 Segment reporting

The disclosure of segment information is required by those entities whose debt or equity instruments are traded in a public market or that file, or are in the process of filing, their financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.

The Company has units listed on the Malta Stock Exchange, though that listing is primarily intended to facilitate the issue of units in the sub-funds. Transactions in all investor shares are executed via the transfer agent and the transfer value of executed transactions is determined in accordance with the relevant prospectus of each sub-fund and is based on the net assets per unit at each valuation date. However, as from 30 June 2021, the units of Long-Term Equity Fund were also admitted to trade on the Malta Stock Exchange as an Exchange Traded Fund. Whilst the units have been formally admitted on the securities list of the Malta Stock Exchange, the process that would ordinarily allow trading has not been completed. Therefore, for the year under review, the process with which units would actually have been subscribed for or redeemed remain unchanged and therefore the listing of such units would not render the entity to fall within the scope of IFRS 8.

3.9 New standards, amendments to published standards and interpretations

Standards, amendments to published standards and interpretations as endorsed by the European Union effective in the current period

The following new standards, amendments to standards and interpretations were endorsed by the EU and are effective for the current reporting period:

- Amendments to References to Conceptual Framework in IFRS Standards
- Definition of Material (Amendments to IAS 1 and IAS 8)
- Interest rate benchmark reform Phase 2 (Amendments to IFRS9, IAS39, IFRS7, IFRS 4 and IFRS 16) effective on 1 January 2021 and endorsed by the EU

The adoption of these standards did not have a significant impact on the financial statements of the Company.

Standards, amendments to published standards and interpretations that are not yet effective

The following new standards, amendments to standards and interpretations were endorsed by the EU but are effective for periods beginning after 1 July 2022, and have not been applied in preparing these financial statements:

• Classification of liabilities as current or non-current (amendment to IAS 1) - Not yet endorsed by the EU

None of these standards, amendments to standards and interpretations are expected to have a significant impact on the financial statements of the Company in the period of their initial application.

4 Fair value measurements

The fair value of financial assets and liabilities traded in active markets are based on quoted market mid-prices at the close of trading on the period end date. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets and liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each period-end date. Valuation techniques used for non-standardised financial instruments, such as options and total return swaps, include the use of comparable recent arm's length transactions, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Company holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1 - quoted market prices (unadjusted) in an active market for an identical instrument;

Level 2 - valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data;

Level 3 - valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data, including the Company's own assumptions, and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustment or assumptions are required to reflect differences between the instruments.

The financial instruments not measured at FVTPL include:

- Cash and cash equivalents, balances due from/to brokers and receivables/payables under sale and repurchase agreements and trade and other receivables. These are short-term financial assets and financial liabilities whose carrying amounts approximate fair value, because of their short-term nature and the high credit quality of counterparties; and
- II. Net assets attributable to holders of redeemable shares. The Company routinely redeems and issues the redeemable shares at the amount equal to the proportionate share of net assets of the sub-fund at the time of redemption, calculated on a basis consistent with that used in these financial statements. Accordingly, the carrying amount of net assets attributable to holders of redeemable shares approximates fair value. The shares are categorised into Level 2 of the fair value hierarchy.

5 Financial risk management

The Company is a self-managed collective investment scheme and any reference to the Investment Manager refers to the founder shareholders who make decisions in line with the policies set out in the Offering Memorandum and Supplements.

Risk management is carried out by the Investment Manager. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company is exposed to various risks arising from the financial instruments it holds. The risk management policies employed by the Company to manage these risks are discussed below.

Market risk

Market risk is the risk that changes in market prices - e.g. interest rates, foreign exchange rates, equity prices and credit spreads - will affect the Fund's income or the fair value of its holdings of financial instruments.

The Company's strategy for the management of market risk is driven by the Fund's investment objective. For description of this, refer to Section 1 Reporting Entity.

The Company's market risk is managed on a daily basis by the respective portfolio manager in accordance with the policies and procedures in place. This includes the estabslishment of a Risk Management Policy (RMP) and of Investment Process Procedures. Then the respective portfolio manager performs the daily pre-trade-checks against the limits set in the RMP which include also the limits set in the Offering Supplement. In the case of any breach an escalation procedure described in RMP is activated. The Company's market positions are monitored monthly by the Risk manager who reports to Board of directors.

The principal tool used to measure the market risk exposure of the Company is a VaR analysis prepared by MSCI RiskMetrics. The VaR of the Company's portfolio is the estimated loss that may arise on the portfolio over a specified period of time (holding period) from an adverse market movement within specified probability. VaR model used is based on the 95% confidence level and assumes 10-days holding period. The overall structure of VaR limits is subject to the review and approval of the Investment Committee and Board of Directors. VaR is measured monthly. Quarterly reports of use of VaR limits are submitted to the Investment Committee and regular summaries are submitted to the Board of Directors.

Market risk (continued)

The below table provides the overall VaR calculations for each sub-fund and period:

| | 2022 | 2021 |
|--|-----------|-----------|
| Global Macro | 909,686 | 418,807 |
| Short Equity (formerly known as Long-Short Equity) | 1,549,323 | 148,669 |
| Long-Term Equity | 8,809,630 | 2,914,334 |

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company holds assets denominated in currencies other than Euro, the functional currency. It is, therefore, exposed to currency risk as the value of the assets denominated in other currencies will fluctuate due to changes in exchange rates.

The Company uses derivatives to manage its exposure to foreign currency. The instruments include foreign currency forward contracts, futures and options. The Company does not apply hedge accounting.

The table below summarizes the Company's exposure to currency risk as at 30 June 2022:

Sensitivity of currency risk is included within the overall VaR measure presented earlier.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Investment Manager manages the Company's exposure to interest rate risk on a daily basis in accordance with the Company's investment objectives and policies. The Company's overall exposure to interest rate risk is monitored on a quarterly basis by the board of directors.

The Company is exposed to the risk that the fair value or future cash flows of its financial instruments will fluctuate as a result of changes in market interest rates, changes in market risk premia and changes in general macro-economic conditions. The investment manager carefully monitors the interest rate risk arising from the interest-bearing financial instruments held by all the sub-funds. Based on the investment manager's view on future interest rates, bonds of various durations are held in order to optimize portfolio returns.

Sensitivity of interest rate risk is included within the overall VaR measure presented earlier.

Exposure to fixed and variable interest rates

The Funds have direct exposure to fixed interest rates through investments in fixed income instruments. The Company's exposure to variable interest rates is not considered to be material. Exposures to interest rate risks are monitored via risk management procedures involving stress testing and sensitivities.

Credit risk

Credit risk refers to the risk that the counterparty will default on its contractual obligations resulting in financial loss to the Company.

All investments made by the investment manager in fixed income instruments take into account the credit risk of such instruments and more specifically whether the yield on the security adequately compensates the investor for the risk of the counterparty defaulting.

At 30 June 2022, all of the Company's cash balances and investments are held with the Company's Custodians/Brokers. The Company's custodians/brokers ratings vary from A-to BBB- (2021: BBB+ to BBB), with four custodians/brokers being not rated. The Portfolio Managers do not anticipate any material losses as a result of this concentration.

Balances due from brokers represent margin accounts, cash collateral for borrowed securities and sale transactions awaiting settlements. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the credit quality of the brokers.

The table below analyzes Global Macro's and Long-Term Equity's portfolio of debt instruments by S&P rating agency category.

Global Macro Fund

| Credit rating | 2022 | 2022 | 2021 | 2021 |

Long Term Equity and Short Equity (formerly known as Long-Short Equity) portfolio of debt instruments is all unrated.

Concentration of credit risk

The investment manager reviews the credit concentration of debt securities held based on counterparties and industries.

As at 30 June 2022 and 30 June 2021, the Company's debt securities exposures were concentrated in the following industries:

| Global Macro Fund | | e 2022 | 30 June 2021 | |
|---|------------|-----------------|--------------|-----------------|
| | Fair Value | % of Net Assets | Fair Value | % of Net Assets |
| | € | | € | |
| Financial assets at fair value through profit or loss | | | | |
| Bonds | | | | |
| Consumer, Cyclical | 803,168 | 2.09% | 7,960,794 | 22.77% |
| Consumer, Non-cyclical | 289,791 | 0.75% | - | 0.00% |
| Commodities | 420,981 | 1.10% | - | 0.00% |

| | 26,404,389 | 68.74% | 28,850,820 | 82.51% |

Credit risk (continued)

| Long-Term Equity | 30 June 2022 | | 30 June 2021 | |
|---|--------------|-----------------|--------------|-----------------|
| | Fair Value | % of Net Assets | Fair Value | % of Net Assets |
| Financial assets at fair value through profit or loss | € | | € | |
| Bonds | | | | |
| Industrial | 308,949 | 0.24% | 356,352 | 0.34% |
| Financial | 879,718 | 0.69% | 515,601 | 0.49% |
| | 1,188,667 | 0.93% | 871,953 | 0.83% |

There were no significant concentrations in the debt securities of credit risk to any individual issuer or group of issuers at 30 June 2022 or 30 June 2021. No individual issuer exceeded 13.15% (2021: 14.73%) of the net assets attributable to the holders of redeemable shares either at 30 June 2022 or at 30 June 2021.

The Fund also restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements with counterparties (approved brokers) with whom it undertakes a significant volume of transactions. Master netting arrangements do not result in an offset of statement of financial position assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Fund's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement. Refer to 'Offsetting financial assets and financial liabilities' section in note 5 for further analysis of the Fund's master netting arrangements.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Amounts arising from ECL

Impairment on cash and cash equivalents, balances due from brokers and loans and other receivables has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The Company considers that these exposures have low credit risk based on the external credit ratings of the counterparties or based on the financial position of the respective counterparty.

The Company monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in the published ratings, the Company supplements this by reviewing changes in bond yields, where available, credit default swap (CDS) prices together with available press and regulatory information about counterparties.

12-month and lifetime probabilities of default are based on historical data supplied by S&P for each credit rating. Loss given default parameters generally reflect an assumed recovery rate of 0%. However, if the asset were credit-impaired, then the estimate of loss would be based on a specific assessment of expected cash shortfalls and on the original effective interest rate.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. At 30 June 2022 and 2021, the Company's liabilities include net assets attributable to redeemable participating shareholders and other financial liabilities.

The Company is exposed to monthly cash redemptions of the Company's shares. The Company's listed securities are considered readily realizable, as the majority of the securities are listed on a stock exchange. The Company may periodically invest in derivative contracts traded over the counter, which are not traded in an organized market and may be illiquid. At 30 June 2022 and 2021, the Company held no investments that it considered illiquid. The following table details the Company's liquidity analysis for its financial liabilities. The table has been drawn up based on the carrying amount of the financial liabilities that settle on a net basis and the carrying amount of those financial liabilities that require gross settlement

All liabilities of the SICAV are paid in 1-3 months.

As at 30 June 2022

Emerging market risks

Investments in emerging markets can be subject to risks not normally associated with more developed markets. These risks mainly relate to the instability of the economies of emerging markets, political uncertainties and, in some cases, the lack of liquidity in the market.

Collateral and other credit enhancements and their financial effect

The Company mitigates the credit risk of derivatives and reverse sale and repurchase agreements by entering into master netting agreements and holding collateral in the form of cash and marketable securities.

Apart from mitigation of the credit risk of derivatives, reverse sale and repurchase agreements, the Company does not use any collateral or other credit enhancements.

Derivative risk

The Company may use derivative financial instruments in the management of its foreign currency exposure. The Company may purchase foreign exchange forward and currency futures contracts to hedge assets and liabilities denominated in foreign currencies.

The pricing of certain derivative instruments, including contracts for differences, futures and options, carry a degree of volatility. In addition, the Company is subject to the risk of failure of any of the exchanges on which it trades or of their clearing houses and in certain cases the counterparties with whom the trades are carried out. The Company may purchase options on a variety of securities exchanges and over-the-counter markets to hedge exposure of underlying fixed income or equity holdings. Trading in futures and options is a highly specialized activity and although it may increase the total return of the segregated portfolios, it may also decrease the total return.

Derivative financial instruments

The Company enters in two types of derivative transactions: exchange traded derivatives and over-the-counter (OTC) derivatives. Credit risk arising from exchange traded derivatives is mitigated by margin requirements.

OTC derivatives expose the Company to the risk that the counterparties to the derivative financial instruments might default on their obligations to the Company.

Derivative financial instruments such as futures and options are transacted with counterparties Interactive Brokers, EDF, Cowen and TradeStation whereas derivative financial instruments such as foreign currency forwards are transacted with counterparties J&T Banka and EDF. One counterparty is rated BBB+ based on rating agency Standard & Poor's rating. The other counterparties are not rated, however they are all deemed reputable credit institutions.

Derivative financial instruments (continued)

Offsetting financial assets and financial liabilities

None of the financial assets and financial liabilities are offset in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements. Similar financial instruments include derivatives, sale and repurchase agreements, reverse sale and repurchase agreements, and securities borrowing agreements.

The ISDA and similar master netting arrangements do not meet the criteria for offsetting in the statement of financial position. This is because they create a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Company or the counterparties. In addition, the Company and its counterparties do not intend to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

The Company receives and gives collateral in the form of cash and marketable securities in respect of the following transactions:

- derivatives; and
- securities borrowing.

Such collateral is subject to the standard industry terms of ISDA's Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty's failure to post collateral.

Derivative financial instruments (continued)

Capital risk management

The capital of the Company's sub-funds is represented by the net assets attributable to redeemable participating shareholders. The amount of net assets attributable to redeemable participating shareholders can change significantly on a monthly basis as the sub-funds are subject to monthly subscriptions and redemptions at the request of shareholders. The investment Manager's objective when managing capital is to safeguard the respective sub-fund's ability to continue as a going concern in order to provide returns for shareholders and to support the development of the investment activities of the sub-funds.

The Investment Manager monitors capital on the basis of the value of net assets attributable to redeemable shareholders.

Positive margin accounts represents cash deposits with brokers, transferred as collateral against open derivative contracts. The Company uses brokers to transact derivative transactions, including those with central counterparties. The amounts due to brokers are collateralised by assets held at such brokers.

In accordance with the Company policy of trade-date accounting for regular-way sale and purchase transactions, sales/purchase transactions awaiting settlement represent amounts receivable/payable for securities sold/purchased but not yet settled as at the reporting date.

7 Trade and other receivables and other assets

Trade and other receivables attributable to founder shareholders amounting to €708,699 (2021: €694,811) are made up of amounts receivable from founder and preferred shareholders amounting to €117 (2021: €126), and amounts receivable from sub-funds amounting to €708,582 (2021: €694,685).

The amounts receivable from the Company's sub-funds are unsecured, interest free and are repayable within one month from the date of the statement of financial position. These amounts relate to outstanding management and performance fees payable by the sub-funds amounting to €509,381 (2021: €483,910) and other recharges made to the sub-funds as follows:

| | 2022 | 2021 |
|--|---------|---------|
| | € | € |
| Global Macro | 62,439 | 57,275 |
| Short Equity (formerly known as Long-Short Equity) | 30,053 | 20,857 |

8 Net income/(loss) on financial instruments at fair value through profit or loss

The net income/(loss) on financial instruments at fair value through profit or loss includes realized and unrealized gains or losses on the movement in the fair value of these assets/liabilities, interest income and expense, dividend income and expense and foreign exchange gains and losses arising on retranslation of financial assets and liabilities at fair value through profit or loss.

Fees and expenses

Management Fee

The Founder shareholders receive a fee equivalent to a percentage per annum, pro-rated on a monthly basis, of the Net Asset Value (NAV) of each Sub-Fund at the end of each month except of the Global Macro sub-fund which NAV is calclated on a quarterly basis. Such fee is payable at the end of the month to which the computation refers.

| | Management fee rate p.a. | Management fee | Management fee payable |
|--|--------------------------|----------------|------------------------|
| | % | € | € |
| 30 June 2022 | | | |
| Global Macro | 1.50 | 548,174 | 147,832 |
| Short Equity (formerly known as Long-Short Equity) | 1.50 | 160,526 | 37,571 |
| Long-Term Equity* | 0.75 | 1,169,595 | 314,962 |
| | _ | 1,878,295 | 500,365 |
| 30 June 2021 | | | |
| Global Macro | 1.50 | 471,268 | 127,446 |
| Short Equity (formerly known as Long-Short Equity) | 1.50 | 172,694 | 42,701 |
| Long-Term Equity* | 0.75 | 614,908 | 211,674 |
| | <u> </u> | 1,258,870 | 381,821 |

^{*}The management fee rate of 0.75% p.a. applies for Class A EUR Shares.

For Class B EUR Shares, a rate of 1.5% p.a. applies.
For Class C CZK, Class D EUR Shares, Class E USD Shares and Class S CHF, a fee of 1% p.a. applies.

For Class I EUR Shares, a rate of 0.5% applies.

The Founder shareholders and PM Squared Limited (see note 13) charge each Sub-Fund (except for Long-Term Equity) a fee based on the performance of the Sub-Fund which is calculated on a quarterly basis

The performance fee represents a percentage of the net profits in respect of each Series of Shares, namely the increase in the NAV per Series of Shares outstanding in respect of each performance period. Performance Fee is subject to a high watermark and, in the case of Global Macro and Short Equity (formerly known as Long-Short Equity), to a cumulative benchmark return of 1 year EURIBOR+400bps per annum for Global Macro and 20% per annum for Short Equity (formerly known as Long-Short Equity) Share Class B EUR, Class C USD and Class B EUR, Class C USD, Class F CZK and 20% per annum for Short Equity (formerly known as Long-Short Equity) Share Class B EUR, Class B EUR, Class B EUR, Class F CZK and Class BP

10 Capital and reserves

10.1 Share Capital

The authorized share capital of the Company is five hundred million (500,000,000) shares, of €1 each which may be issued as Shares of any class representing any sub-fund.

As at year end, the Company had 130,330 (2021: 129,830) issued share capital divided as follows:

- a) 100,000 (2021: 100,000) Founder Shares of € 1 each;
- b) 28,830 (2021: 28,830) Preferred Shares of € 1 each,
- c) 1,500 (2021: 1,000) Associate Shares of € 1 each.

Class A1 and A2 Founder Shares amounted to 100,000 (2021: 100,000) and are subscribed to Mr Tomáš Martinec, Mr Juraj Podracky and Lovixia Investments Limited which is an entity owned 75% by Mr Tomáš Martinec and 25% by Mr Juraj Podracky. Overall, as at 30 June 2022 and 2021, 75,000 Founder Shares are owned by Mr Tomáš Martinec (37,500 A1 Shares directly and 37,500 A2 Shares through Lovixia Investments Limited) and 25,000 Founder Shares are owned by Mr Juraj Podracky (12,500 A1 Shares directly and 12,500 A2 Shares through Lovixia Investments Limited).

The Founder Shares are the only voting shares and carry a right to participate pari passu in the assets of the Company on a winding up following settlement of any and all amounts due to the Investor Shares. Any amounts declared in favour of the Founder Shareholders out of Company Profits but not distributed by way of dividend shall be accumulated within such relevant share class and will be reflected in their value. Subject to the payment of the Preferred Return to the Preferred Shareholders, the Founder Shareholders carry the right to a Founders' Return as declared by the Directors of the Company.

Different classes of Preferred Shares have been issued which are held by preferred shareholders. As at 30 June 2022 and 2021, these are divided into 17,580 (2021: 17,580) Class B Preferred Shares, 6,250 (2021: 6,250) Class C Preferred Shares and 5,000 (2021: 5,000) Class D Preferred Shares.

Class B Preferred Shares are subscribed to by Mr Tomáš Martinec, Class C Preferred Shares are subscribed to by Mr Juraj Podracký and Class D Preferred Shares are subscribed to by Mr Ales Vávra.

The Preferred Shares do not carry voting rights but are entitled to the payment of a Preferred Return and do not carry a right to participate in the assets of the Company (including its sub-funds) on a winding up. Preferred Shares are offered to the Portfolio Managers in terms of the Offering Supplement for each sub-fund. The Preferred Shares can be redeemed at the option of the Company only and are hence classified as equity in the statement of financial position.

The Preferred Return is the entitlement of the Preferred Shareholders to the payment of a maximum amount computed by reference to the Base Fee (being the management fee) and the Performance Fee payable by the respective sub-fund to which the Preferred Shares relate.

Associate Shares amounted to 1,500 as at 30 June 2022 (2021: 1,000). 500 Associate Shares are being subscribed to by Mr Milan Šikut, 500 Associate Shares are being subscribed to by Mr Pavol Redler and 500 Associate Shares are being subscribed to by Mr Tomáš Lukacovsky.

Associate Shares do not carry any voting rights.

The Associate Shareholders shall be entitled to receive dividends out of the Company's profits attributable to Founder shareholders as and when, and to the extent declared by the directors specifically in favour thereof, provided that the dividend entitlement attached to the Associate Shares shall rank after the dividend entitlement attached to the Preferred Shares, but prior to the dividend entitlement of the Founder Shares.

The Associate Shares are only transferrable with the prior approval of the Board.

The Associate Shares may be redeemed at the option of the Company by providing such notice period as it may determine in its sole discretion. In the event of any such redemption, the holder thereof shall be entitled to the payment of the amount of capital originally paid in by the respective Associate Shareholder upon issuance of the Associate Shares. During the current year, the Associate Shares have thus been classified as equity in the statement of financial position.

10 Capital and reserves (continued)

10.1 Share Capital (continued)

The Associate Shareholders will not be entitled to participate in the assets of the Company (including its Sub-Funds) on a winding up (except repayment of paid up capital following settlement of any and all amounts due to the holders of Investor Shares and the Associate Shareholders shall rank pari passu amongst themselves in respect of such right of repayment as aforesaid).

The Associate Shareholders shall not be entitled to any other distribution by the Company other than as described above.

Investor Shares shall be offered to Eligible Investors for subscription as per the Offering Supplement for each sub-fund. Investor Shares do not have any voting rights (refer also to note 11)

Investor shares can be redeemed monthly for cash equal to a proportionate share of the Company's net asset value attributable to the share class. The investor shares are classified as financial liabilities and are measured at the present value of the redemption amounts.

Investor shares are issued and redeemed based on the Company's net asset value per share, calculated by dividing the net assets of the Company, calculated in accordance with the Company's Offering Memorandum, by the number of Investor Shares in issue.

10.2 Dividends

The following dividends were declared by the Company to founder shareholders during the year.

| | 30 June 2022 € | 30 June 2021 € |
|---|-------------------|-------------------|
| €1.48 (2021: €1.16) per founder share | 148,285 | 115,932 |

| After the end of financial year, the following dividends were declared by the Company to its shareholders | | |
| | 30 June 2022 € | 30 June 2021 € |
| €6.10 (2021: €6.50) per preferred share | 176,151 | 187,431 |

11 Net assets attributable to redeemable participating shareholders

Series of Shares methodology

Series of Shares are issued for each class of shares on each Dealing Day within each Performance Period, with the Lead Series being the Series of Shares issued upon the expiry of the Initial Offer Period. Each Series is designated by reference to their month of issue. Each new Series is issued at the initial price of €100 per Share. On the last Business Day of a Performance Period, any performance fee accruing and payable for each Series crystallizes. Subsequently, each issued Series in respect of which a Performance Fee has been charged is consolidated with the Lead Series. The Lead Series will therefore always be in existence.

Each Series has identical rights. The Performance Fee payable will vary depending on the time of investment by the Investor, thus resulting in a different NAV per share for each Series. Thus, depending on when an Investor acquires Shares, such Investor may be charged a Performance Fee for gains in a particular Performance Period while other Investors in another series, whose Shares are recovering any previous losses, will not be charged a Performance Fee.

In the event that a Shareholder redeems or transfers Shares during a performance period, any accrued but unpaid Performance Fee on those Shares will crystallize on the date of such redemption or transfer.

Consolidation of series

In order to keep the number of different Series outstanding at any one time to a minimum, all profitable Series of a Sub-Fund may be consolidated into one Series of the particular Sub-Fund after the close of each calendar quarter. Therefore, at the end of the Performance Period, all series are "rolled up" and converted into the Lead Series so long as there are no outstanding losses to carry forward.

11 Net assets attributable to redeemable participating shareholders (Continued)

Consolidation of series (continued)

If, at the end of the Company's calendar quarter, any Series has a NAV per share that is either greater than or equal to the higher of (a) €100 or equivalent, (i.e. the purchase price per share of that Series) and (b) the price per share at which a Performance Fee was last charged (such a Series being a "Profitable Series"), shares of that Profitable Series may be exchanged for shares of such other Profitable Series then in issue, or of a newly-created Series, as the Company in its discretion selects (the "Selected Series"). Shares of each Profitable Series outstanding at the end of each calendar quarter generally will be exchanged by redeeming such shares at their then current NAV per share in consideration for the issue of such number of shares in the Selected Series which has the same aggregate net asset value as the redeemed shares of the Profitable Series on the first day of the following calendar quarter at the Net Asset Value per share of the Selected Series. Only Profitable Series in a calendar quarter may be consolidated into the Selected Series at the end of that calendar quarter.

There will be no change in the aggregate NAV of an Investor's holding due to the conversion of any Series of Shares into the Lead Series, although a different number of Shares may be held by such Investor after the conversion.

Redemptions

Subject to the restrictions appearing in the Offering Memorandum, the Articles of the Company or, the Offering Supplement relating to the relevant Sub-Funds, investors may at any time request, in writing, that the Company redeems any or all of their Investor Shares in a Sub-Fund. The procedure for the redemption of shares is set out in the relevant Offering Supplement.

Payment of the Redemption proceeds will be made by the Company within ten (10) Business Days following the date on which such Shares are redeemed by the Company. Payment will be made by telegraphic transfer or credit in an account in the name of the registered holder or, in the case of joint holders, in the name of the first named holder.

Subject to approval by the investors, the Directors may, at their discretion, satisfy any application for Redemption of Shares by the transfer to those investors of a proportion of the assets of the relevant Sub-Fund in specie, which proportion is equivalent in value to the shareholding of the investor requesting the Redemption, but adjusted as the Directors may determine to reflect the liabilities of the Company.

An investor who wishes to redeem all or any part of his holding must give the Administrator notice of his intention as specified in the relevant Offering Supplement. If accepted by the Company, the redemption request will be dealt with on the next Dealing Day at the Net Asset Value per Share of the applicable class/Series established on that day. The Redemption Price per Share on the relevant Dealing Day will be calculated to 4 decimal places.

Redemption Notices received after the time specified in the relevant Offering Supplement will be carried over to the following Dealing Day. Furthermore, the Directors may, in particular circumstances and at their discretion, also accept that a Redemption Notice received on or by a Dealing Day, and will be dealt with at the Net Asset Value per Share of the applicable Class / Series of such Dealing Day.

12 Taxation

The Maltese tax regime for collective investment schemes is based on the classification of funds into prescribed or non-prescribed funds in terms of the conditions set out in the Collective Investment Schemes (Investment Income) Regulations, 2001 (as amended). In general, a prescribed fund is defined as a resident fund, which has declared that the value of its assets situated in Malta amount to at least 85% of the value of the total assets of the fund. A non-prescribed fund is a fund, which does not qualify as a prescribed fund.

On the basis that the sub-funds within the SICAV are classified as non-prescribed funds for Maltese income tax purposes, then the sub-funds should not be subject to Maltese income tax on their income or gains (other than on income (if any) from immovable property situated in Malta).

However, Maltese resident investors therein may be subject to a 15% final withholding tax on capital gains realised on any redemption, liquidation or cancellation of shares in the SICAV. Nevertheless, the Maltese resident investor may request the SICAV not to effect the deduction of the said 15% final withholding tax in which case the investor would be required to declare the gains in his income tax return and will be subject to tax at the normal rates of tax.

Any gains or profits derived on any transfer of units in the sub-funds by investors who are not resident in Malta should not be chargeable to Maltese income tax, subject to the satisfaction of certain statutory conditions.

With respect to any distributions by the SICAV, dividends paid from Malta source taxed profits, Malta source profits which are exempt from tax up to the level of the ultimate shareholder, or profits received by the SICAV from the Foreign Income Account of another Maltese company, should not be subject to further tax in the hands of the shareholders. In the case of distributions from the SICAV's Final Tax Account (if any), the shareholders should not be subject to further tax on such dividends but should not be entitled to claim a credit or refund of any tax directly or indirectly paid on such profits.

Distributions from the SICAV's foreign source profits allocated to their Untaxed Account, or distributions of any Malta source profits which are not subject to tax and which are allocated to their Untaxed Account, to a Maltese resident person (other than a company), or to a non-resident person who is owned or controlled by, or who acts on behalf of, a person who is ordinarily resident and domiciled in Malta, should be subject to a withholding tax of 15%.

Distributions (if any) from the SICAV's equalisation reserve are treated as dividends for Maltese income tax purposes and should be subject to a withholding tax of 15% when paid to a Maltese resident person (other than a company), or to a non-resident person who is owned, or controlled by, or who acts on behalf of a person who is ordinarily resident and domicilled in Malta

In the case of the SICAV's foreign investments, any capital gains, dividends, interest and other gains or profits may be subject to tax imposed by the country of origin concerned and such taxes may not be recoverable by the SICAV or by its shareholders under Maltese domestic tax law.

The redemption, or any other transfer of shares and any distribution on winding-up of the sub-funds may result in a tax liability for the shareholders according to the tax regime applicable in their respective countries of incorporation, establishment, residence, citizenship, nationality, domicile or other relevant jurisdiction.

13 Related Parties

Identity of related parties

The Company has a related party relationship with its founder shareholders, preferred shareholders, associate shareholders, and its directors and their dependants. Furthermore, it has a related party relationship with the Investment Advisors by way of common shareholding.

Related party transactions and balances

The Company appointed PM Squared Limited, a private limited liability Company incorporated in Bermuda, to implement the investment strategy of Global Macro as specified in the prospectus. The Investment Advisor contract can be terminated by the Company by giving not less than six months' notice.

PM Squared Limited receives 35% of the performance fees incurred by Global Macro (refer to note 9) as well as charges Global Macro and Long-Term Equity investment research fees which amounted to:

Transactions with key management personnel

The total director's fees for the year were \in 23,000 (2021: \in 23,696). The total outstanding directors' fees were \in 5,479 (2021: \in 5,751) at year-end. The listing of the members of the board of directors is shown on page 2 of the Annual Report.

During the year, one of the directors provided consultancy services to the Company amounting to €28,711 (2021: €27,120).

14 Significant Events

Due to the outbreak of conflict between Russia and the Ukraine, followed by new sanctions announced by the U.S. and the EU countries against Russia, the Fund has assessed the relevant risk factors relating to its business, results of operations and financial condition in a holistic approach. The Fund has no business flows with Russian and Ukrainian counterparties and service providers nor with Russian banks and, therefore, is not negatively affected as of the date of the approval of these financial statements.

On 6 October 2021, Tomas Martinec has resigned as a portfolio manager of the Metatron Global Macro Fund due to his other involvement in JaT Investment Company. On 10 May 2022, Juraj Podracky and on 16 May 2022 Pavol Redler were appointed as portfolio managers of this sub-fund.

15 Subsequent Events

All approved net subscriptions received and redemptions settled after year end up to the date of approval of these financial statements from each of the sub-funds were:

| | € |

16 Comparative Information

Comparative figures disclosed in the main components of these financial statements have been classified to conform with the current year's disclosure format for the purpose of compliance with International Financial Reporting Standards (IFRSs) as adopted by the EU, and the requirements of the Maltese Companies Act (Cap. 386).

Further Information

1 Risk Warning

Past performance is not necessarily a guide to future performance. The value of investments and the currency in which these are denominated may go down as well as up and investors may not always get back their initial investment. Investments in collective investment schemes should be regarded as a medium to long-term investment.

Alternative Investor Funds are non-retail schemes. Therefore, the protection normally arising as a result of the imposition of the Malta Financial Services Authority's investment and borrowing restrictions and other requirements for retail schemes either do not apply or apply only to a small degree. Investors in Alternative Investor Funds are not protected by any statutory compensation arrangements in the event of the Company's failure.

This Annual Report does not constitute an offer of units in the Company. The opinions expressed are given in good faith and should not be construed as investment and/or tax advice.

2 Offering document and fund particulars supplement

Full information on the Company is contained in the Offering Document and the Funds Particulars Supplements which are available from the registered office of the Company or the Investment Manager.
